

DODGE JOURNEY

DODGE

WITH EVERY TURN OF THE KEY DISCOVERIES ARE UNCOVERED. NEW PLACES ARE FOUND. FRIENDS ARE MADE. NEW HORIZONS SET. GET READY: A JOURNEY AWAITS. The new Dodge Journey jets onto the scene with a sporty toned and chiselled profile and signature Dodge crosshair grille. Dodge Journey's 2.0 DOHC 1-4 Diesel engine was designed to deliver. When it's all said and done, this crossover is absolutely ready for anything.

PERFORMANCE

Whether you choose an automatic or manual transaxle, Journey has the power to move you. The 2.0 DOHC 1-4 diesel accelerates you with 103kW of power and 310 Nm of torque and is offered with either a 6 speed manual or the 6 speed dual clutch Getrag automatic that delivers excellent performance and fuel efficiency with quieter operation.

Journey models equipped with manual transaxles also feature Hill Start Assist. This feature prevents the car from rolling away unintended when trying to pull away on an up or down gradient. The system engages automatically when a gradient of 3 percent or more is detected; it then acts to hold Journey stationary for two seconds after the brake is released giving the driver time to apply the throttle.

SAFETY

SOPHISTICATED ENGINEERING SYSTEMS like crush zones, safety cage construction, knee blockers, and more all work together to absorb or direct impact energy away from the passenger compartment in the unfortunate event of an accident. **AIR BAGS** Advanced multistage driver and front-passenger air bags, front and rear supplemental side-curtain air bags for all three rows, and driver and front-passenger thorax supplemental side seat-mounted air bags are all standard on Journey. Which means that in the even of a collision there's an extra level of protection that deploys at just the right time with right amount of force to match the incident's severity. In the event of a collision, Journey's standard air bags, including supplemental side curtain airbags, blanket passengers for extra protection. **INTEGRATED CHILD BOOSTER SEAT** Journey is the first mid-size crossover vehicle to offer integrated child booster seats for children who have outgrown child safety seats. **STANDARD ELECTRONIC STABILITY CONTROL (ESC)**. ESC, which includes all-speed traction control, Brake Assist, Electronic Roll Mitigation, and Trailer Sway Control, assist drivers in maintaining control of their vehicles during extreme steering manoeuvres. ESC works to correct the vehicle's course by automatically, controlling the throttle and applying the brakes at individual wheel. All-speed traction control reduces engine power, applies the brakes to spinning wheels and transfers torque to the appropriate wheel when slippage is detected. Brake Assist automatically increases braking pressure to its maximum force during emergency brake situation. Electronic Roll Mitigation senses when a rollover may occur and applies braking force to the correct wheel to reduce the likelihood of such an event. Trailer Sway Control detects "sway" unique to towing and then engages Journey's brakes to slow the vehicle and trailer down, reduces engine torque, and then increases the brake force to only one side of the vehicle to help counteract the sway from the trailer. **ANTILOCK BRAKE SYSTEM (ABS)** Standard four-wheel disc brakes use state-of-the-art electronics to help prevent wheel lockup for improved steering under extreme braking or slippery conditions. **TYRE PRESSURE MONITOR** Keep an eye on safe and proper tire pressure. A display alert comes through a warning lamp when low tyre pressure is detected.

INTERIOR

COCKPIT Sit back and relax in Journey's driver seat. It's instantly clear that this cockpit was designed to be as intuitive as it is stylish. Radio controls are loaded behind the steering wheel and power locks and windows are easily within reach. The instrument cluster glows a cool blue for easy readability. **PREMIUM STEREO** To take your tunes down the road, AM and FM just don't cut it. So with Journey you'll have the standard six-disc CD player with MP3 capability. **LIGHT EMITTING DIODE (LED)** Welcome to your first class cabin. Focused LED driver and front passenger foot well lights provide soft illumination when the doors are open or the headlamps are on for added convenience.

STORAGE

Designed to Grab Attention! Engineered to be useful! Journey's interior is flat out ingenious. It holds both people and their gear with the same degree of attention. Seats were made to be comfortable and entryways to be accommodating. Storage bypassed the status quo to become ingeniously inventive. Every inch of Journey's cabin was mapped and calculated to create the right ratio of passenger space to cargo room. Seats were constructed to accommodate seven people or fold flat for optimum cargo capacity. Floors got storage bins. Glove boxes got makeovers. Hidden compartments were added to seat cushions. The result is the perfect combination of form and function. Now this is living room.

SEVEN PASSENGER SEATING Journey's altogether accommodating interior starts with standard seven passenger seating featuring 60/40 split fold –flat stadium style second row seats and a six way power drivers seat. The Journey sports a stain resistant, antistatic seat fabric that employs a dual action technology to help resist stains by beading spills for easy cleaning. All seats even in the second row recline for optimum passenger comfort. **TILT 'N SLIDE** Thanks to Tilt 'N Slide second row seats and rear doors open at a convenient 90 degrees. Journey has one of the easiest rear entry of any vehicles in its class. The stadium style seats move easily to accommodate third row passengers. **THIRD ROW SEATING** When designing a car that grabs attention it only makes sense for it to accommodate a crowd! Journey's third row gives seating for two extra passengers. The 50/50 split-fold flat rear seats recline six degrees for added relaxation. **CUP HOLDERS** Bring on the night because front cup holders have illuminated rings that glow when the headlamps are turned on. **REAR CARGO AREA** Journey has an additional level within the cargo bin that conceals the jack, jack tools and puncture repair kit.

OVERHEAD CONSOLE The overhead console features amiable LED map/reading lamps with swivelling bezels for dynamic directional lighting. The same lights, along with driver and front passenger foot well lights, illuminate when any door is opened. There's also a sunglass bin for easy access to your shades while driving. **LED TORCH** The LED flashlight which is attached to the inside of the cargo area is removable and recharges in the cradle in the rear quarter panel trim. **REAR TEMPERATURE CONTROLS** Dials located on the overhead console let rear seat passengers control the rear HVAC units for the perfect climate controlled environment. **CONVERSATION MIRROR** It's like having eyes in the back of your head. Easily retracted from the overhead front console, the conversation mirror offers both in-vehicle monitoring of young travellers and helps the driver feel more engaged in passenger conversations.

1

Cargo Area A standard hidden storage bin and access door to the tool and jack compartment is located behind the rear seat. When hauling gear is a priority, simply fold down the second and third row seats for 1461 litres of cargo capacity.

2

Rear Cup Holders Clever cup holders conveniently located on the rear quarter panel accommodate your drinks. Two more cup holders can be found in the second row console.

3

Map Pockets Found on all four passenger doors, moulded map pockets give you even more places to stash stuff like maps, books, drink containers and more. The location makes it easy to retrieve what you need even when Journey's in motion.

4

In Floor Storage The second row floor provides even more clever storage. Two in floor storage bins with latching lids can hold up to a dozen 330ml cans each or other items. For added convenience, these bins have washable, removable liners so they're easy to clean and make the perfect tailgate party accessory.

5

Centre Console Easily accessible, the centre floor console offers illuminated cup holders and storage that keeps larger items out of sight. The available dual media jacks and power outlet allow passengers to kick back with gaming, video or audio hook up.

6

FLIP 'N STOW The hinged cushion on the fold flat front passenger seat flips forward to reveal a large bin perfect for storing a laptop or other such items.

7

Dual Glove Box This two tiered glove box surpasses its utilitarian roots. Level one is a compartment aptly named ChillZone that can maintain the cool temperature of two 330ml cans with the help of Journey's AC. Level two features space to hold the owners manual plus other essential items.

8

Instrument Panel Storage A small built in bin is the perfect catchall for small odds and ends that need a home!
